

Rolling Beeswax Honeycomb Candles is Fun and Easy!

You will need:

- Craft mat or cutting board
- Pizza cutter or utility knife
- Metal edge ruler
- Scissors
- Hair dryer to gently warm the wax if necessary

Cut the beeswax sheet in half, making two pieces about 8" x 8 1/4".

Cut the wick about 1/2" longer than each beeswax sheet.

Lay the wick along the edge of the sheet and start rolling the candle by bending over about 1/8" of the wax, leaving the extra 1/2" of wick for the top of the candle. Press tightly to secure the wick. This is the only time you will press really hard.

As you begin to roll, apply gentle pressure as you push the rolled candle forward. Make sure to use even pressure so that both ends of the candle are straight and even.

Continue until you reach the end of the wax sheet and gently press the edge into the candle. When you are done use light pressure to make sure the candle is round, but be careful not to press too hard, which might damage the honeycomb pattern.

Trim the wick to 1/4" before lighting.

Other fun ideas:

Cut the sheets at an angle to make tapered candles.

Use metal cookie cutters to make theme candles or ornaments.

Use scraps to make smaller candles.

Beeswax candles burn clean and bright! Keep the wick trimmed to 1/4" for even burning. Never leave a burning candle unattended. Keep candles out of reach from children and pets. Keep burning candles away from ceiling fans and drafts.

Extinguish a candle if it smokes, flickers repeatedly, or the flame becomes too high.
